

Tables

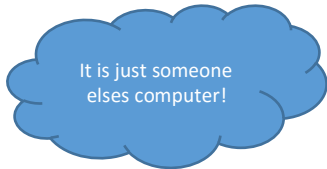

Here is a simple text table:

1a	1b	1c	1d
2a	2b	2c	2d
3a	3b	3c	3d

They can have title rows and styles applied (in this case 'Plain Table 3'):

A	B	C	D
1a	1b	1c	1d
2a	2b	2c	2d
3a	3b	3c	3d

Tables can contain almost any element, as with HTML,

<ul style="list-style-type: none">• One• Two• Three	<table><tr><td>Including</td><td>Nested</td><td>Tables</td></tr><tr><td>Why</td><td>Oh</td><td>Why</td></tr></table>			Including	Nested	Tables	Why	Oh	Why
	Including	Nested	Tables						
Why	Oh	Why							
<ul style="list-style-type: none">• Alpha• Beta	<div>And images, SmartArt, etc. Here is a Shape (a Cloud) containing some text – because every technical document should mention clouds.</div> <div></div>
